

Congratulations on your purchase of a PocketScope™ from Welch Allyn.

Please note that we have upgraded the handle on all PocketScopes manufactured after May, 2000.

All new PocketScopes have a knurled finish to prevent slippage, a rheostat to control light levels, and are configured one of two ways: a handle for AA batteries only, or convertible handle which accepts both AA and rechargeable batteries.

We hope you enjoy your new, improved PocketScope from Welch Allyn.
