equipment
testing and
calibration

The background of the page features a close-up, shallow depth-of-field photograph of medical equipment. In the foreground, a clear plastic nebuliser is visible, with a blue syringe-like component attached to its side. A clear plastic tube is connected to the nebuliser. In the background, a clear plastic face mask with a green strap is visible. The overall color palette is light blue and white, creating a clean and professional aesthetic.

our service

In one simple visit our fully trained engineers are able to test and calibrate all of your medical equipment, on-site. Certificates are issued upon completion, enabling 3 QOF points.

Having your medical equipment tested and calibrated reduces maintenance costs, downtime and significantly improves efficiency, allowing medical devices and their component parts to work longer at a minimal increase to costs.

We test and calibrate over 25 types of equipment of all different makes and models, from blood pressure monitors, medical scales and spirometers to nebulisers, ear syringes and ECG machines. A full list can be found at www.tagmedical.co.uk

- On-site medical equipment testing and calibration with no call out fee

- Fully qualified and accredited engineers operating nationwide

- State of the art medical testing equipment

- Impartial unbiased advice

- Detailed reports supplied for each piece of medical equipment

- Convenient, efficient and flexible service

- Telephone technical support available 24 hours a day, seven days a week

- All makes and models fully tested and calibrated to original manufacturers' specifications

- NHS and nGMS contract compliant

reassuring...

- ISO 9001 quality assured for the testing and calibration of medical equipment, underlining our ability to deliver a quality assured service in a highly demanding environment.

- 3 QOF POINTS (nGMS Contract, Management Point 7) are available to you when you have systems in place that ensure regular and appropriate inspection, calibration, maintenance and replacement of equipment.
- Cost efficient. Our on-site service is more cost effective than sending items away! This means no down-time of essential equipment, no loss or damage during transit and complete confidence in your equipment.
- Safety and accuracy: Be safe in the knowledge that all of your equipment is accurate, accounted for and fully traceable.
- Unbiased: No conflict of interest. We are experts in testing and calibration and focus solely on this. We do not sell equipment, ensuring our reports remain 100% impartial and objective.
- Results: A professional folder containing the test certificates will be presented on completion and all tested equipment will be clearly labelled for easy reference and QOF point inspection.

the informed Practice Managers choice

“Fantastic job TAG! Such a professional and efficient service!”

Practice Manager, Oldham

“TAG you did a brilliant job. I was so pleased with the service and look forward to seeing you next year”

Practice Manager, Romford
