

Nitrile Examination Glove

Examination glove with Certified Virus Protection, made with chemical resistant nitrile.

Our Signal Nitrile Examination Glove is designed to provide the comfort of latex with the protection of nitrile. It meets the EN 374-5 VIRUS Standard, which means that viruses will not pass through the glove and the material will not degrade during use. **Only gloves meeting this specific Standard will provide this level of protection.**

The glove will protect against viruses, bacteria, fungi and harmful pathogens, including coronavirus, MRSA and SARS. It also has a slightly longer cuff, for additional safeguarding.

It contains no natural latex proteins and our unique, low-modulus formulation offers superior comfort and fit, as well as excellent tactile sensitivity.
