

Clinell Universal: Product Update

From mid-January 2026, the look of the Clinell Universal Wipes 200 pack is changing. We have taken the opportunity to update the packaging design based on feedback from hospitals across the UK.

Current

New

Key visual changes

1. QR Code

A QR code has been added to the front of the pack. Scanning it takes users directly to our website, where they can access instructions for use, efficacy information and compatibility data. This makes important information quicker and more convenient to find.

2. Period after opening

Clinell Universal Wipes can be used for up to six months after opening. To support easier tracking, the lid now includes an **optional** space where users can write the date the pack was opened and the date it should be disposed of.

3. General packaging updates

We have also made some general visual updates, including changing the circle in the top-left corner to green and refining the green wave across the top of the pack.

If you require any further information about this product, please contact the IPC team. Additional product details can also be accessed by scanning the QR code on the right.
