

clinisoothe⁺

Introducing Clinisoothe+

We are a brand dedicated to skin health

Clinisoothe+ has a different approach to skin. We recognise that skin problems are unique, and for some people, they don't just affect the face. Our gentle formula has a skin neutral pH and can be applied anywhere on the face or body where breakouts, blemishes, irritation and redness occur.

Clinisoothe+ Skin Purifier has 7 benefits in 1 revolutionary product formulated for daily use. Our advanced hypochlorous technology purifies, cleanses, soothes, balances, protects, recovers and calms skin.

Our Philosophy

We care about your skin

This is why we've made the transition from skincare to skin health.

Our secret to healthy skin? Clinisoothe+ Skin Purifier. Our unique formula delivers powerful antimicrobial protection to protect your skin from harsh pollutants. It soothes and calms breakouts, and provides an optimum environment for healthy skin to flourish.

- Skin neutral pH
- Suitable for all skin types
- Hypoallergenic and non-irritating
- Antimicrobial protection
- Free from alcohol, toxins, sulphates, preservatives, and artificial fragrance

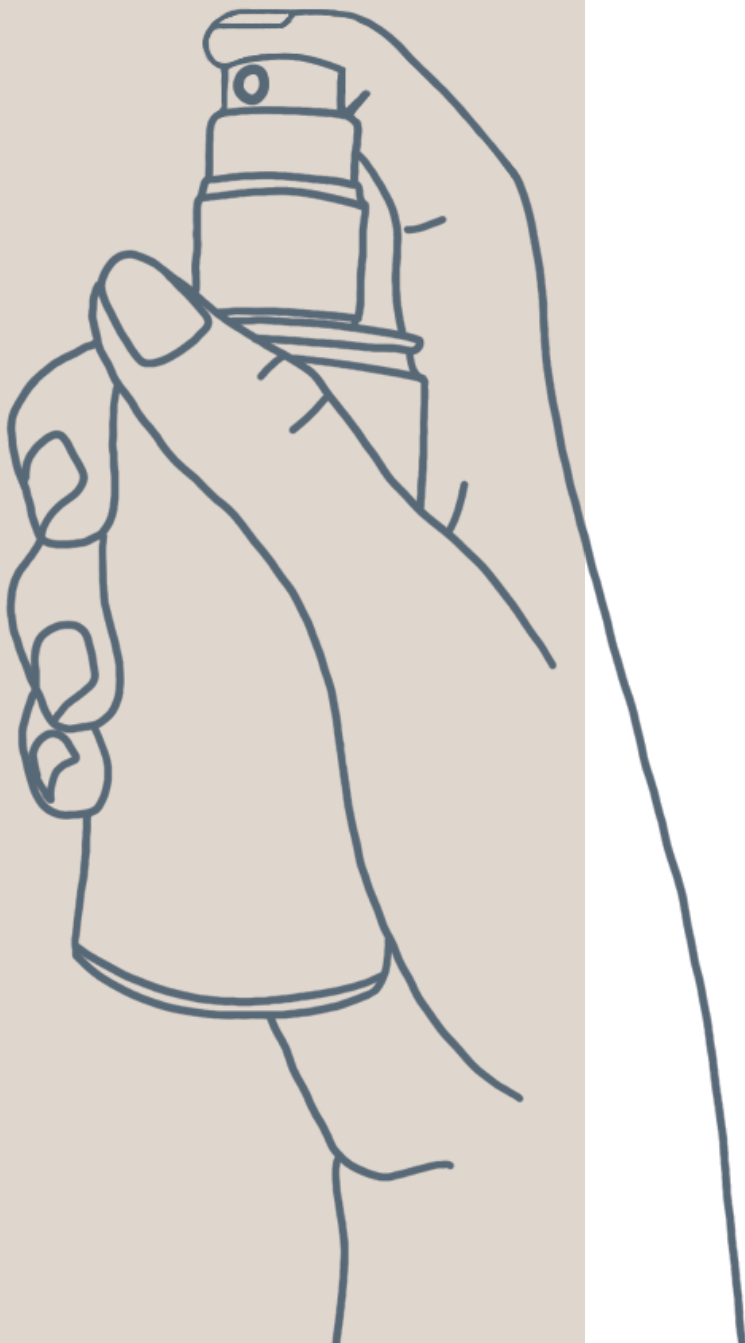

How to Use

100ml

Small but powerful. Our 100ml Clinisoothe+ Skin Purifier is perfect to spritz over cleansed skin when you're on the go.

250ml

Pour Clinisoothe+ Skin Purifier onto a cotton pad, and gently wipe over the face and neck areas, or area of skin concern. Reapply as many times as necessary for healthy, glowing skin.

Skin & Pollutants

Our skin acts as a natural shield against pro-oxidative chemicals and physical air pollutants that we are exposed to in everyday life. But prolonged or repetitive exposure to high levels of these pollutants can have profoundly negative effects on the skin, including premature ageing and an increase in the incidence of psoriasis, acne and skin cancers. It can also worsen allergic skin conditions such as atopic dermatitis and eczema.

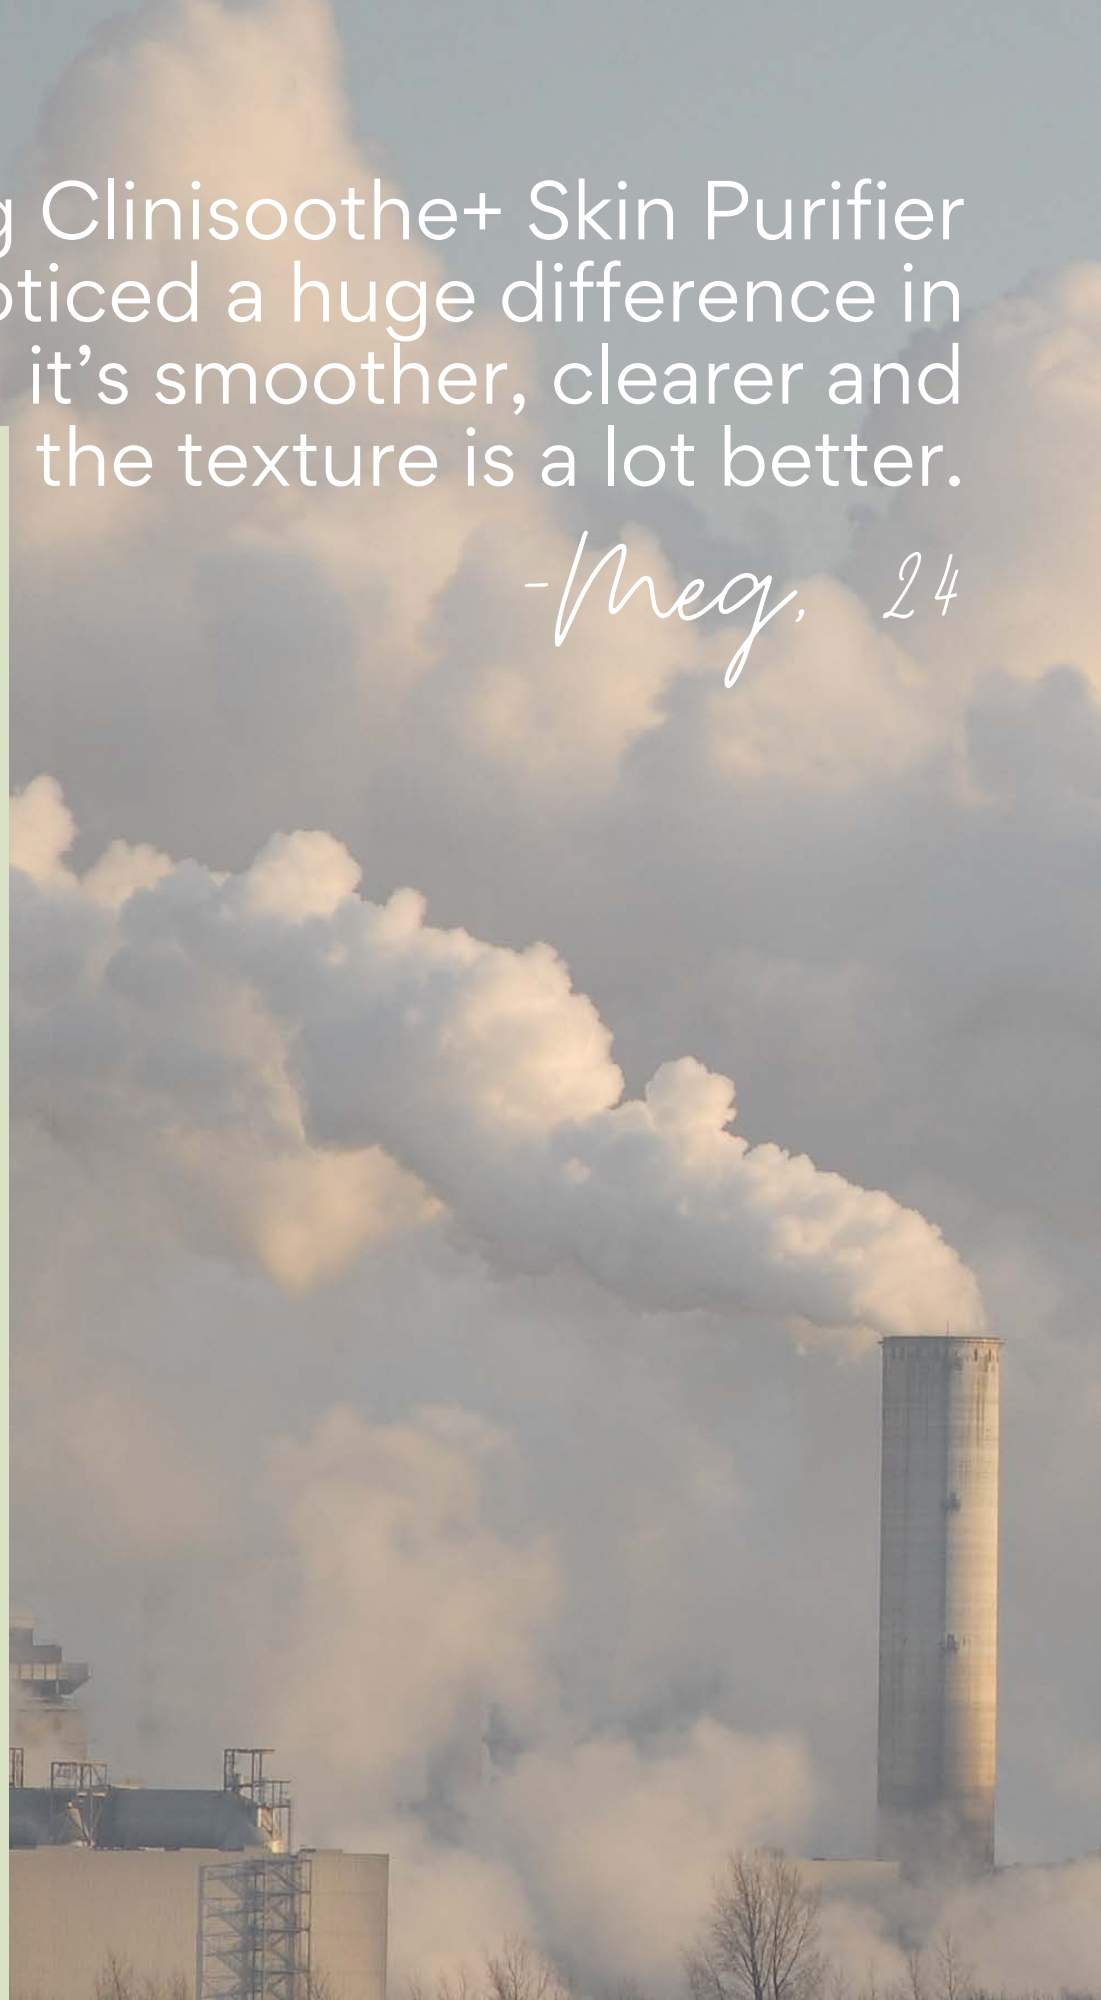

'Air pollutants have major effects on the human skin. Various air pollutants such as ultraviolet radiation, polycyclic aromatic hydrocarbons, volatile organic compounds, oxides, particulate matter, ozone and cigarette smoke can damage the skin by inducing oxidative stress.'

Since using Clinisoothe+ Skin Purifier
I have noticed a huge difference in
my skin; it's smoother, clearer and
the texture is a lot better.

-Meg, 24

The Exposome

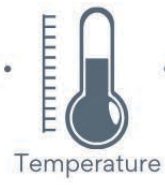

The 'exposome' refers to the social and environmental factors a person is exposed to from the moment they are born until they die. These include nutrition, pollution, UV radiation, viruses, bacteria and more.

Clinisoothe+ Skin Purifier actively combats the effects of the exposome on the skin. Our product is clinically proven to reduce redness, soothe skin, calm breakouts and provide cleansing antimicrobial protection. Clinisoothe+ hypochlorous will also help your skin to rapidly recover from harsh exposure to pollutants and contamination caused by the environment that we live in.

The Human Exposome

Clinisoothe+ is magic. It's life
and skin changing. I will never
stop using it!

-Kate, 40

The Science

Developed by leading scientists, Clinisoothe+ is the result of many years research and development to produce a highly effective skin-safe product to combat the effects of the exposome. The best part? Clinisoothe+ is gentle enough for even the most sensitive skin due to its nature replicating formula.

Our formula uses an advanced hypochlorous technology which soothes and balances the skin on the face and body, reducing redness and promoting rapid skin recovery, with visible results.

The discovery of the skin purifying technology that underpins Clinisoothe+ was first published in the British Medical Journal in 1915. Since then, the medical profession has been trying to perfect this natural yet highly effective and skin safe solution. Where others have failed, our scientists have succeeded in achieving the goal of a truly high purity, highly stable, skin compatible product: Clinisoothe+.

Clean Skincare

It's not always easy to reduce packaging if your product is a liquid solution, but we are working hard to make sure that the benefits of Clinisoothe+ technology are not offset by the resources used to produce them.

All of the components of Clinisoothe+ products are already 100% recyclable, vegan friendly and cruelty free and we already generate a large proportion of our own electricity from solar panels on our manufacturing facilities.

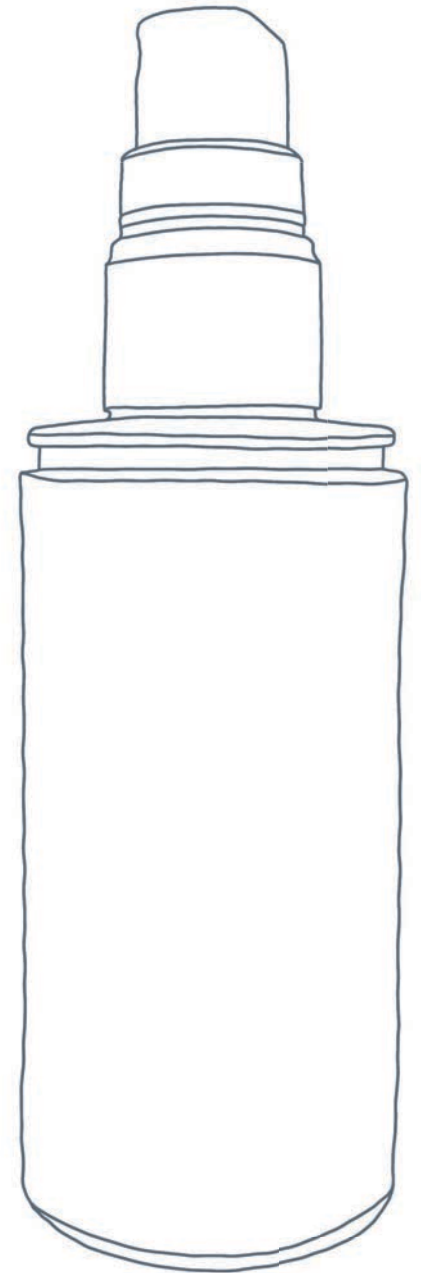

*Good for you,
and the planet*

However, as part of our sustainability strategy, we are also investigating further ways of minimising our global impact on the environment, including the possibility of adopting biodegradable packaging made from by-product sugarcane.

Why Clinisoothe+?

Our powerful antimicrobial formula has a skin neutral pH, is **non-toxic**, contains **no alcohol, no artificial fragrance** and is even **non-cytotoxic** to re-growing skin cells. This enables Clinisoothe+ to achieve powerful results, even on the most sensitive skin.

Clinisoothe+ is created with a unique oxidising method to ensure our advanced hypochlorous is completely **skin safe**. As well as this, Clinisoothe+ is completely **vegan friendly** and **cruelty free**.
