# Leukoplast Hypafix

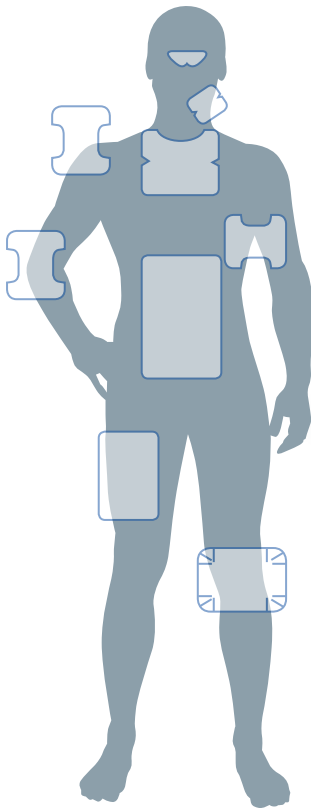

## For wide-area fixation on frequently moving and highly contoured body parts

This highly conformable, very soft and breathable wide-area fixation was designed by our experts to comfortably secure wound pads, as well as instruments, probes, catheters and measuring devices, especially on frequently moving and highly contoured body parts.

### Stretchable: made for moving body parts

- Non-woven fabric
- Resistant to tearing and pulling

### High wearing comfort

- Soft material
- Stretches with movement

### Breathable

- Air and moisture permeable

### Low-allergy

- Tolerated by patients with sensitive skin
- Latex-free

### Easy application

- Made for contoured body parts

# Leukoplast Hypafix transparent

## For waterproof wide-area fixation of wound dressings

This skin-friendly, ultra thin polyurethane (PU) film was developed by our experts to protect reliably against contamination while allowing the skin to breathe.

### Waterproof and almost invisible

- Ultra-thin PU film
- Protects reliably against water
- Allows bathing and hydrotherapy

### Flexible adaptation to body contours

- >97% rate the adaptation to body contours as good to excellent<sup>1</sup>

### Quick and easy application

- Intuitive application technique with distinctive red stripe
- >90% of experts confirm easy application<sup>1</sup>

### Excellent wearing comfort

- >97% of users rate the wearing comfort as good to excellent<sup>1</sup>

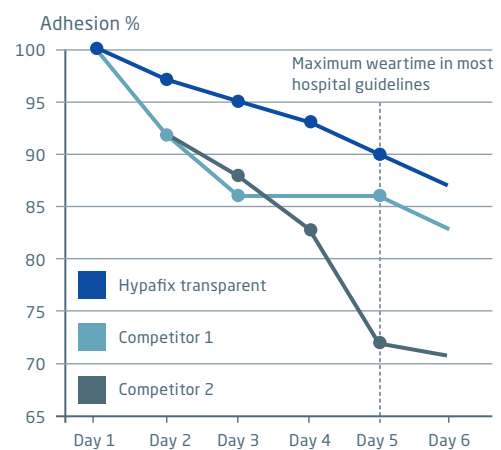

### Supports infection prevention

- Protects against bacteria and contaminants

### Breathable

### Long-lasting adhesion<sup>2</sup>

- Better adhesion than competitors and lasts longer
